

Year 3, Spring Term Sculpture

Year 3 looked at volcanoes in topic and learnt about the different rocks which surround a volcano. We were inspired to create our own papier mâché volcanoes.

First we sketched a volcano, from a photograph, in pencil. We discussed and planned how we would construct our volcano sculpture.

Then we created a 3D sculpture of our volcano by covering a cone with papier mâché. We created different texture on our volcano by adding extra layers around it. We created different shades of paints by blending different colours.

For our final piece, we brought all of our skills together to create a 3D sculpture of a volcano.
