Dear Parent,

Re: Head lice

A case of head lice has been detected in your child's class. Anyone can get head lice... mainly through direct head-to-head contact but also from sharing hats, brushes and other personal items. Head lice are a problem in many communities and do not reflect poor hygiene or social status.

Please do your part to prevent the spread of this communicable condition by checking your child(ren) daily for the next few weeks, and on a regular basis thereafter. Lice infestation is much easier to treat if caught early.

If you should discover a case of head lice, please notify the parents of your child's friends. This is the best way to protect your family and community.

Advice: if you buy medicated lotions and sprays, please read the instructions given as some may require to be reapplied after 7 days.

Thank you for your cooperation.

Yours sincerely

Annette Rook – Headteacher
